

ProFruit Machinery™ is a family-based company that started with a father and son and their shared desire to offer more fruit, berry and vegetable processing possibilities for both leaders of their market and businesses that aspire to become such one day.

For almost 10 years we have been working with various fruit, berry and vegetable processing equipment in our juice production-based company “Savos sultys”. This way we have tried and tested the equipment from almost all producers in the market including it’s leaders. We have gained an extensive experience working with all the equipment parts of the processing lines, we constantly communicate with other producers and users of this equipment and for these reasons we truly understand what the effective work in fruit, berry and vegetable processing field requires.

Our core values are reliability, the highest quality and comprehensive assistance to the client in all matters. These values are also supported by the fact that our team consists of true professionals who have been working in a food processing equipment industry for more than 20 years and are capable of ensuring all the best engineering solutions.

100 L Stainless steel tank with level sensors and mixing can store or mix liquid products and works as a buffer tank before the filling process.

100 L stainless steel tank is used as a buffer tank before the filling process. The tank can be used for storing or mixing the product.

There are level sensors installed which control the level inside the tank so it won't overflow. Usually we offer this tank before using our Bag in Box fillers, for filling viscous liquids like puree, jam and similar.

- Optional additional connection for mixer
- Tank is on the wheels
- Possibility to order in different sizes
- Made from stainless steel

Interested in other tanks? Check out our [Stainless steel tanks](#) and a [Tank with agitator](#).
