

ProFruit Machinery™ is a family-based company that started with a father and son and their shared desire to offer more fruit, berry and vegetable processing possibilities for both leaders of their market and businesses that aspire to become such one day.

For almost 10 years we have been working with various fruit, berry and vegetable processing equipment in our juice production-based company “Savos sultys”. This way we have tried and tested the equipment from almost all producers in the market including it’s leaders. We have gained an extensive experience working with all the equipment parts of the processing lines, we constantly communicate with other producers and users of this equipment and for these reasons we truly understand what the effective work in fruit, berry and vegetable processing field requires.

Our core values are reliability, the highest quality and comprehensive assistance to the client in all matters. These values are also supported by the fact that our team consists of true professionals who have been working in a food processing equipment industry for more than 20 years and are capable of ensuring all the best engineering solutions.

Berry and fruit crusher is used for crushing products before further processing.

Products are supplied to the berry crusher through the inlet by bin tipper, conveyor or by manually pouring the products from a box.

Underneath the outlet you can place a monoscrew or other pump with a hopper and transfer the mash for further processing.

Mill has interchangeable sieves for different fruits/berries/vegetables. The berry crusher can also crush stone fruits due to the special mill construction which does not damage the stone or seed.

- Powerful 5.5kw crusher engine
- Small and compact size
- Mounted on pivoting wheels
- Product can be supplied in different variations
- Has a bottom outlet for the crushed mash
