

ProFruit Machinery™ is a family-based company that started with a father and son and their shared desire to offer more fruit, berry and vegetable processing possibilities for both leaders of their market and businesses that aspire to become such one day.

For almost 10 years we have been working with various fruit, berry and vegetable processing equipment in our juice production-based company “Savos sultys”. This way we have tried and tested the equipment from almost all producers in the market including it’s leaders. We have gained an extensive experience working with all the equipment parts of the processing lines, we constantly communicate with other producers and users of this equipment and for these reasons we truly understand what the effective work in fruit, berry and vegetable processing field requires.

Our core values are reliability, the highest quality and comprehensive assistance to the client in all matters. These values are also supported by the fact that our team consists of true professionals who have been working in a food processing equipment industry for more than 20 years and are capable of ensuring all the best engineering solutions.

**COMMERCIAL OFFER FOR FRUIT AND VEGETABLE
WASHER ELEVATOR MILL DOSIMILL 1000**

Description	Capacity	Quantity	Price EUR.	Pack. Cost Eur
Fruit and vegetable washer elevator mill DOSIMILL 1000 with dosing unit for pack press/hydraulic press	1000 kg/h	1	7 650.00	160.00
TOTAL:			7 810.00	

Optional	Price EUR.
Additional payment for different el. supply	300.00
Sieve for crusher with different holes on request (for berries, stonefruits, vegetables)	200.00
Different measurements or individual solution for the machine	On request

Spare parts	Price EUR.
Spare MAXIMILL/DOSIMILL 1000 crusher motor	500.00
Spare sieve for crusher with different holes on request	200.00
Spare conveyor belt set	850.00
Spare 1 pc. Belt module	10.00
Bearing for conveyor axis	80.00
Stainless steel wheel	25.00

1. Ex-works Lithuania.
2. Production time: 8-10 weeks.
3. Country of origin: EU.
4. Made from stainless steel materials.
5. Complies with EU standard CE certificates.
6. Payment terms – 50% with the order, 50% before loading the equipment.
7. Equipment is covered by 36-month warranty. Warranty period for bearings, engines and other bought parts are 12 months.

Fruit and vegetable washer elevator mill with dosing unit **DOSIMILL** is used for washing and milling various products and dosing the grinded mash into hydraulic press or destoning machine. The dosing unit of the washer elevator mill helps to dose the right amount of mash into hydraulic press or destoning machine. This option is mainly used when you need to crush a certain amount of fruit mass before pressing the juice.

Firstly, the grinded mash gathers in the dosing unit. There is a sensor inside the unit which detects when the unit is full and stops the machine. Then the operator can easily open the dosing valve and pour out the grinded mash. After the mash is poured out, the dosing valve should be closed. After that, machine starts the washing and milling process automatically.

- The crushing head of the machine is round, so all the crushed mash goes directly out for further processing. This feature significantly helps when washing the head as there are no corners.

Our round shape technology is superior to other producers', because a lot of fruit mash gets stuck in the corners of square-shaped heads for hours and can cause juice fermentation!

- The dosing unit has a sensor inside which detects when the unit is full and stops the machine.
- The machine has additional table in front of the basin for putting fruits or boxes on it.
- V form washing basin helps fruits and vegetables move directly to the conveyor, therefore less fruit stay in the basin.
- Integrated water-spraying system provides additional

washing when lifting the fruits up the conveyor.

- Belt conveyor has a water drainage and speed regulation system.
- Optional replaceable cutting graters/sieves are available for different fruits and berries.
- The mill does not damage the fruit seed.
- Powerful 2.2 kW crushing engine can crush various fruits, berries and vegetables – from soft raspberries to hard apples, beets, etc.
- Machine is entirely made of stainless steel and easy to clean after using.
- Same machinery only without dosing unit **MAXIMILL 1000**
