

ProFruit Machinery™ is a family-based company that started with a father and son and their shared desire to offer more fruit, berry and vegetable processing possibilities for both leaders of their market and businesses that aspire to become such one day.

For almost 10 years we have been working with various fruit, berry and vegetable processing equipment in our juice production-based company “Savos sultys”. This way we have tried and tested the equipment from almost all producers in the market including it’s leaders. We have gained an extensive experience working with all the equipment parts of the processing lines, we constantly communicate with other producers and users of this equipment and for these reasons we truly understand what the effective work in fruit, berry and vegetable processing field requires.

Our core values are reliability, the highest quality and comprehensive assistance to the client in all matters. These values are also supported by the fact that our team consists of true professionals who have been working in a food processing equipment industry for more than 20 years and are capable of ensuring all the best engineering solutions.

Mechanical double juice filters provide filtration of juice before pasteurizing.

Mechanical double juice filters are made of stainless steel. The set includes two parallel stainless-steel filters that can work separately one from each other. The double juice filters filtrate the juice and eliminate various thick particles in it. This provides particularly clean juice. The valves of the filters can also be shut off separately during the washing process or for other purposes.

- Available mesh: 60 µm, 200 µm, 300 µm, 400 µm, 500 µm.
- Connection D25.
- Capacity: 2000 L/h.
- Stainless steel ensures longevity as well as quality of the product.
- Stainless steel filters are easy to clean after using.
