

Manual bottle filler GRAVITY

Manual bottle filler with 4/6/12 filling heads fills various liquids into bottles.

The filler is especially easy to use. The filling mechanism works on the basis of gravity. After inserting the filling head into the bottle, a strong stream of liquid starts to flow inside. When the liquid reaches the right level of the bottle, filling process finishes automatically.

Available outputs: 600 L/h, 900 L/h, 1500 L/h

- The filler is completely made of stainless steel.
- Gravitational mechanism provides a strong stream as well as easy and effective work.
- Comes with a buffer tank for fluid.
- Buffer tank has integrated liquid level sensors which help to follow the liquid level in the buffer tank.
- Filler is perfect for various liquids which are similar to water consistency, such as juice, wine, vodka, etc.
- The filler can have an optional pump for liquid transfer from tanks.
- Machine is mounted on the pivoting wheels.

Name	Capacity	Dimensions, cm	Weight
GRAVITY (4 Heads)	600 l/h	58X90X180	45
GRAVITY (6 Heads)	900 l/h	86x65x180	80
GRAVITY (12 Heads)	1500 l/h	86x70x180	100
