

ProFruit Machinery™ is a family-based company that started with a father and son and their shared desire to offer more fruit, berry and vegetable processing possibilities for both leaders of their market and businesses that aspire to become such one day.

For almost 10 years we have been working with various fruit, berry and vegetable processing equipment in our juice production-based company “Savos sultys”. This way we have tried and tested the equipment from almost all producers in the market including it’s leaders. We have gained an extensive experience working with all the equipment parts of the processing lines, we constantly communicate with other producers and users of this equipment and for these reasons we truly understand what the effective work in fruit, berry and vegetable processing field requires.

Our core values are reliability, the highest quality and comprehensive assistance to the client in all matters. These values are also supported by the fact that our team consists of true professionals who have been working in a food processing equipment industry for more than 20 years and are capable of ensuring all the best engineering solutions.

6. Payment terms – 50% with the order, 50% before loading the equipment.
7. Equipment is covered by 36-month warranty. Warranty period for bearings, engines and other bought parts are 12 months.

Multi-purpose Jam Cooker with a mixer is designed to produce various jams, sauces, marmelades, purees and other viscous products.

Multi-purpose jam cooker is double-walled and entirely made from stainless steel. Machine has an integrated mixer with specially made scrapers which prevent product from sticking. The jam cooker has adjustable speed as well as fully automatic temperature and cooking time control. The machine also has an integrated touchscreen panel with ability to set the recipes, time, temperature and mixing speed. Therefore, it significantly eases the cooking process and reduces the workload.

The heating of the product can be done in two ways. The jam cooker can be produced with it's own electric heating elements using glycerin heating instead of water.

Alternatively, the heating can be done by hot water which can be supplied from our specially made HEAT or ECOHEAT pasteurizers. When heating is done with our jam cooker, you can supply the product into the pasteuriser for a final fast pasteurization in higher temperatures.

Available volumes: from 200 L to 500 L.

- Machine is perfect for producing various jams, purees, sauces, marmelades, goulashes and other products.
- Has an integrated mixer with specially made scrapers.
- Jam cooker has an adjustable speed with interated

- automatic temperature and cooking time control.
