

ProFruit Machinery™ is a family-based company that started with a father and son and their shared desire to offer more fruit, berry and vegetable processing possibilities for both leaders of their market and businesses that aspire to become such one day.

For almost 10 years we have been working with various fruit, berry and vegetable processing equipment in our juice production-based company “Savos sultys”. This way we have tried and tested the equipment from almost all producers in the market including it’s leaders. We have gained an extensive experience working with all the equipment parts of the processing lines, we constantly communicate with other producers and users of this equipment and for these reasons we truly understand what the effective work in fruit, berry and vegetable processing field requires.

Our core values are reliability, the highest quality and comprehensive assistance to the client in all matters. These values are also supported by the fact that our team consists of true professionals who have been working in a food processing equipment industry for more than 20 years and are capable of ensuring all the best engineering solutions.

## COMMERCIAL OFFER

### SEMI-AUTOMATIC BOTTLE RINSER

Description	Capacity	Quantity	Price EUR.	Pack. Cost Eur
Semi-automatic Bottle Rinser	Up to 1200 bot./h	1	7 200.00	80.00

Optional	Price EUR.
Change parts for additional shaped bottle size	700.00
Filtering cartridge 60µm and housing in aisi316	650.00
Extra cost for version with recycling kit (pump, filter, tank)	1 500.00

1. Ex-works Lithuania.
2. Production time: 16 weeks.
3. Country of origin: EU.
4. Made from stainless steel materials.
5. Complies with EU standard CE certificates.
6. Payment terms – 50% with the order, 50% before loading the equipment.
7. Equipment is covered by 36-month warranty. Warranty period for bearings, engines and other bought parts are 12 months.

The **bottle rinser** is designed to rinse the inside of new bottles, before filling them, avoiding water drops on the bottles outside.

Bottle rinser is a great solution for easily maintaining hygiene standards. The operator manually places the bottles upside down in one of the 20 positions on machine's central plate. The plate is turning in step-by-step motion.

Firstly, one rinsing nozzle sprays the water inside the bottle. Then the table starts rotating which makes the water drip down together with any residues that need to be removed.

The water jet is operated by the bottle itself (no bottle – no spraying) and can be adjusted as needed, according to different bottle specifications.

The dripping time is about 10 sec. This includes the time needed for the bottle to make a complete turn before the operator can take it away.

- Machine requires manual loading and unloading of the bottles
- The bottle rinser operates with water injection.
- The water is filtered using a 0,35 µm filtering cartridge, supplied together with the machine.
- The central plate has 20 bottle rinsing positions
- The bottle rinser is mounted on the wheels.
- Produced totally in stainless steel AISI 304.

### Technical specifications:

- Output: adjustable up to 1200 b.p.h.
- Voltage: 220 V – 50 Hz
- Installed Power: 0,35 kw
- Measurements: 1000 mm x 1000 x h 850 mm.
- Weight: 90 kg
- Water consumption: approx 30-40 Litres/hour
- Water infeed fitting: 1.3/4"
