

ProFruit Machinery™ is a family-based company that started with a father and son and their shared desire to offer more fruit, berry and vegetable processing possibilities for both leaders of their market and businesses that aspire to become such one day.

For almost 10 years we have been working with various fruit, berry and vegetable processing equipment in our juice production-based company “Savos sultys”. This way we have tried and tested the equipment from almost all producers in the market including it’s leaders. We have gained an extensive experience working with all the equipment parts of the processing lines, we constantly communicate with other producers and users of this equipment and for these reasons we truly understand what the effective work in fruit, berry and vegetable processing field requires.

Our core values are reliability, the highest quality and comprehensive assistance to the client in all matters. These values are also supported by the fact that our team consists of true professionals who have been working in a food processing equipment industry for more than 20 years and are capable of ensuring all the best engineering solutions.

**COMMERCIAL OFFER FOR MANUAL BOTTLE  
FILLER Vacuum bottle filler**

Description	Capacity	Quantity	Price EUR.	Pack. Cost Eur
Vacuum bottle filler	400 bot/h	1	2 800.00	80.00

Optional	Price EUR.
Mignon kit in stainless steel with two filling heads for filling small bottles (minimum capacity 5ml )	550.00
Extension legs in stainless steel for filling bottles higher than 330mm	550.00

1. Ex-works Lithuania.
2. Production time: 8-10 weeks.
3. Country of origin: EU.
4. Made from stainless steel materials.
5. Complies with EU standard CE certificates.
6. Payment terms – 50% with the order, 50% before loading the equipment.
7. Equipment is covered by 36-month warranty. Warranty period for bearings, engines and other bought parts are 12 months.

**VACUUM BOTTLE FILLER** fills various liquids into glass bottles (sizes 0,2 L to 1,5 L). The biggest advantage of this machine is that it's perfect for filling various liquids, including high viscosity products, such as tomato juice, oil, soap, etc. Vacuum bottle filler has a vacuum dish and uses the vacuum to pump the liquid and fill it into bottles. This provides a hygienic filling process because liquid does not have any touch with any pumps or mechanic details. Filling is done by simply placing the filling hose to any type of tank or container.

During the work process, operator inserts the bottle into the filling head which then automatically starts filling liquid into the bottle. When the desired liquid level is reached, machine stops the filling process. Liquid level in the bottle is adjusted by setting the filling nozzle. Vacuum bottle filler has 4 filling heads.

- Perfect for various liquids, especially viscous liquids like tomato juice, oil, soap, chemicals, etc.
- The bottle filler is completely made of stainless steel.
- Vacuum mechanism provides a strong stream as well as easy and effective work.
- Vacuum bottle filler has adjustable nozzles which control the liquid level in the bottle.
- Filling is done by simply placing the filling hose to any type of tank or container.
- Machine is easy to use, clean and maintain.
- Machine has 4 filling heads.
